<div> After built all the parts and assembling the robot, our next step was to implement the components of the robot.</div> <div> </div> <div> We are now in the testing step, making the programming of the sensors and control the robot.</div> <div> </div> <div> In the next pictures, we were programming the ultrasonic sensors with Arduino Uno:</div> <div> </div> <div> </div> <div> </div> <div> The first end design may be such, already incorporating sensors(ultrasonic) and controller(Arduino Uno).</div> <div> </div> <div> </div> <div> </div> <div> </div> <div> </div> <div> we are waiting to see your changes. We waited in Spain</div> <div> </div> <div> </div>
